

Sunrise DFE

Sunrise DFE introduces the latest generation of software enhancements to Domino's digital press portfolio. With the new Sunrise DFE package, designed specifically for single-pass inkjet devices, customers can benefit from improved workflow efficiency and increased uptime without interruption to production, including the ability for real-time data ripping on the **N730i**.

The software package includes everything needed to transform customer requirements into print-ready jobs in a streamlined process. This fully integrated system allows for improved colour management control along with in-line variable data ripping, removing existing bottlenecks for a variety of applications.

Benefits of Sunrise DFE

- ◆ Fully variable data capability
- ◆ Extended colour gamut
- ◆ Ultra high-speed RIP performance
- ◆ Machine learning implemented to optimise the performance of the RIP
- ◆ Intuitive traffic light system to easily identify whether the file can be ripped inline
- ◆ Colour management control, including the ability to edit spot colours and bring the system back into gamut
- ◆ Full workflow included to create a print-ready PDF
- ◆ Preflight reporting included
- ◆ Simple connection to MIS/ERP
- ◆ Domino job cost calculator – allows you to calculate the cost of printing the job prior to production
